

Gate & reception — appointments, vehicles, and access control in one place.

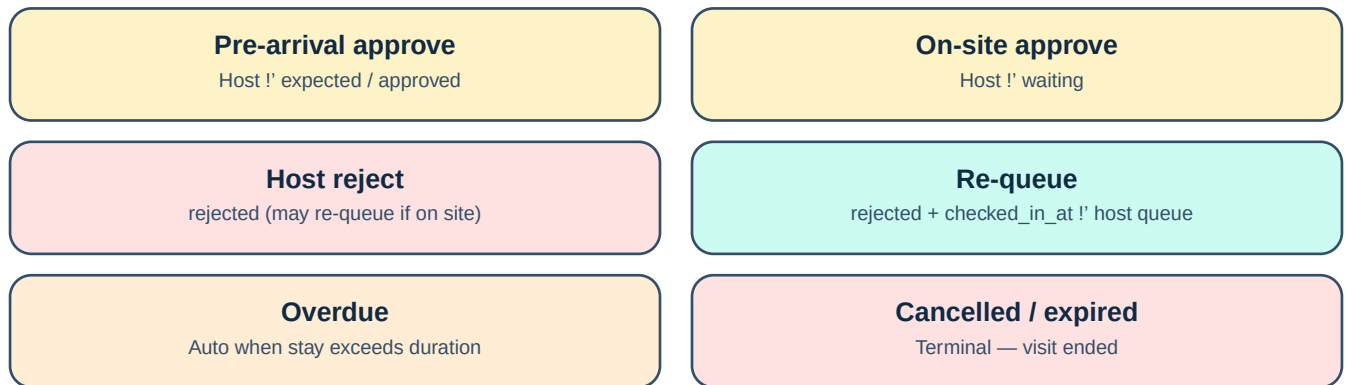

Happy path (top !' bottom)

* Queued at reception: technical status pending_approval, UI label stays "On site".

Visit Lifecycle (continued)

Branches & exceptions

Who acts at each stage

Rules to remember

- On-site occupancy: desk/gate statuses OR (pending_approval / rejected WITH checked_in_at).
- Reception checkout != checked_out; guest may still appear at gate until left_premises is confirmed.
- Gate/kiosk checkout can complete departure in one step when configured.
- Pre-arrival pending_approval is NOT on-site occupancy until the visitor checks in.
