

Visitor, Appointment & Vehicle Access Management System Logic

1. Purpose

A unified system for managing appointments, visitors, vehicles, executive calendars, notifications, privacy, reporting and audit trails.

2. Core Principle

One appointment creates synchronized records for Executive Calendar, Reception, Gate Security, Visitor Management, Vehicle Management, Notifications and Audit.

3. Roles

Administrator; Gate Security; Main Reception; Executive Reception; CEO Secretary; DCEO Secretary; CEO; DCEO; Employee/Host; Management/Auditor.

4. Visitor Classification

Standard, VIP and VVIP. Only authorized executive roles may assign VIP/VVIP status.

5. Appointment Workflow

Create appointment → Check calendar availability → Capture visitor details → Optional expected vehicle → Save → Update executive calendar, reception and gate → Send email/SMS.

6. Vehicle Logic

Every vehicle must be captured at the gate. Search registration; if found verify and create vehicle entry; if not found register vehicle, driver and passengers before approval.

7. Reception Logic

Reception verifies identity, checks in visitors, notifies host, issues visitor pass if required, and records check-out.

8. VIP/VVIP Privacy

Gate Security and Main Reception must NOT see mobile numbers, email addresses, NRC/passport numbers or confidential meeting details. Only CEO, DCEO, their secretaries and Executive Reception may access full contact information.

9. Vehicle Status

Expected → Arrived at Gate → Entry Approved → On Site → Exit Gate → Exited.

10. Visitor Status

Expected → Arrived at Gate → Entered Premises → Reception Check-In → Waiting → In Meeting → Checked-Out → Left Premises.

11. Notifications

Email, SMS and in-system alerts for appointment creation, reminders, arrival, check-in, VIP arrival, cancellation, rescheduling and check-out.

12. Audit

Record all appointment changes, vehicle entries/exits, visitor check-in/out, VIP profile access, and permission changes.

13. Database

Users, Roles, Employees, Visitors, VisitorContactDetails, Appointments, Visits, Vehicles, ExpectedVehicles, VehicleEntries, Notifications, AuditLogs, Gates, ReceptionPoints and ParkingBays.

14. End-to-End Flow

Appointment Created → Notifications → Expected Lists → Vehicle Captured at Gate → Reception Check-In → Host Notification → Meeting → Check-Out → Vehicle Exit → Audit & Reports.
